Project 1: Group 6

Members: Jake Byford
George Hyros
Rob Peron
Mike Seifer
Narender Sharma

Our project will explore Covid-19 data. We want to see if there are any correlations across various demographics. Within our analysis, we will try to answer the following questions. Are there any relationships between:

- Rates of Infection and Death vs. Income
- Rates of Infection and Death vs. Population Density
- Rates of Infection and Death vs. Age
